

STEWART HALL CLOSURE, EFFECTIVE NOVEMBER 1, 2021

CANCELLED!

Due to quick work by Tim Obrien, we have installed a UV air sanitizing system in the heater duct work in the hall. We have also installed two air filter systems in the hall. These steps along with minimal fresh air input will allow Stewart Hall to be used by our members. This is not a permanent fix but should provide a reasonable level of safety for our current usage. We will continue to work on plans for a complete new ventilation system for the hall. The UV system and air cleaners will also work with a new system so our investment will not be wasted. My thanks to Tim for digging into this issue!

Kevin McGrath, President, BCLCA

STEWART HALL USAGE RULES

- 1. Heat must be on during any event, so the air sanitizer works.**
- 2. Any unvaccinated guests MUST BE MASKED except when eating or drinking at any event.**
- 3. The front windows (opposite kitchen) must be open a minimum of 2 inches during all events.**
- 4. Air Cleaners must be running continually during all events.**

Any failure to follow the above will result in an immediate shut down of any event without further notice.

Kevin McGrath, President, BCLCA
